

## CLAIMS:

1. A waste fitting comprising a first open end, a second open end in liquid communication with the first open end, and an inlet between the first and second ends,  
5 the waste fitting further comprising means for retaining a plug in a first position, the inlet being located between the first position and the second end, and means for retaining a plug in a second position, the second position being located between the inlet and the second end.
- 10 2. A waste fitting as claimed in Claim 1, wherein one or both of said retaining means comprises a respective seat for a plug.
3. A waste fitting as claimed in Claim 1 or 2, wherein a seat for a grille is provided at or adjacent said first end, the grille, when seated in the waste fitting, providing said  
15 means for retaining a plug in said first position.
4. A waste fitting as claimed in Claim 3, wherein the grille includes a collar portion, the collar portion providing said means for retaining a plug in said first position.
- 20 5. A waste fitting as claimed in Claim 4, wherein said collar portion is located within said first end generally at said first position.
6. A waste fitting as claimed in any preceding claim, wherein the waste fitting comprises a sleeve-like body which provides said first and second open ends and in  
25 which said inlet is formed.
7. A waste fitting as claimed in Claim 6, wherein the sleeve is tapered at said first plug position such that the width of the sleeve narrows in a direction generally towards said second end.

8. A waste fitting as claimed in Claim 5 or 6, wherein the sleeve is tapered at said second plug position such that the width of the sleeve narrows in a direction generally towards said second end.

5 9. A waste fitting as claimed in any one of Claims 6 to 8, wherein the sleeve is generally narrower at said second position than at said first position.

10. A waste fitting as claimed in Claim 9, wherein said sleeve is generally narrower at said second position than between said first position and said second position.

10

11. A waste fitting as claimed in any preceding claim, wherein said plug is reversably expandable in width.

12. A sanitary ware fixture comprising a waste fitting as claimed in Claim 1.

15

13. A sanitary ware fixture as claimed in Claim 12, comprising a plug hole and an overflow outlet, the plug hole comprising said first end of the waste fitting and the inlet being in liquid communication with the overflow outlet.
